

# Guilherme Bonato

## CTO & Solutions Architect

CTO at **Sul Alimentos**, where I am building the order management and delivery route tracking system on top of my own **LifeBusinessSuit** (LoginHUB + MoneyAPP). 10 years building systems that survive their second year in production: back-end in **C# / .NET 8**, **Node.js**, **Go** and **Python**; front-end in **React**, **Vue** and **Angular**; **Clean Architecture, DDD, CQRS, SOLID**. Rare hybrid background in **network infrastructure and application security**.

### CORE STACK

**BACK-END**
C# · .NET 8 / .NET Core / Framework 4.8 · Node.js · TypeScript · Python · Go

**FRONT-END**
React · Vue.js · Angular · Vite · Tailwind CSS · Razor Pages

**DATA**
SQL Server · PostgreSQL · MySQL · MongoDB · Redis · EF Core · Dapper · Drizzle

**MESSAGING & EVENTS**
Apache Kafka · Azure Service Bus / Queue Storage

**CLOUD & DEVOPS**
Docker · AWS · Azure · Google Cloud · Cloudflare (WAF/CDN/DNS) · Nginx · Linux · Git · Azure DevOps · CI/CD

**ARCHITECTURE**
Clean Architecture · DDD · CQRS · Microservices · SOLID · TDD · REST APIs

**SECURITY**
DevSecOps · Secure by Design · OWASP · Secrets management · Key rotation · Firewalls & corporate networks

**AI & DATA**
LLM-based engineering tooling · Python data analysis · Legacy dependency mapping

### PROFESSIONAL EXPERIENCE

#### CTO — Chief Technology Officer

**SEP 2026 – PRESENT**

Sul Alimentos · Meat distributor · Full-time

- **Order management:** building the system that carries an order from intake to delivery, in one place.
- **Route tracking:** planning and following the fleet's delivery routes.
- **On top of the LifeBusinessSuit: LoginHUB** (multi-tenant identity provider, JWT + Magic Link + 2FA) becomes the system's sign-in and **MoneyAPP** covers the financial side.
- **Technical leadership:** architecture, stack choices and the company's engineering standards.

**STACK** Vue.js · TypeScript · Node.js · PostgreSQL · Docker · LoginHUB · LBS_MoneyAPP

#### Technical Lead & Security Champion

**FEB 2026 – AUG 2026**

GotoBiz · Full-time · Hybrid

- **Damage control & DevSecOps:** led incident response on critical vulnerabilities (SQL Injection) and restructured security at the edges; established a Secure by Design culture with active code auditing, strict key rotation and centralized secrets management.
- **Architectural modernization:** drove the migration of a tightly coupled legacy monolith — **60+ .sln solutions on .NET Framework** — into a distributed microservices ecosystem on .NET 8.
- **Multicloud & containers:** Docker and container orchestration across AWS and Google Cloud, deploying microservices in consistent, secure and highly available environments.
- **AI applied to engineering:** Python tooling and AI models that map hidden legacy dependencies, guiding safe, incremental slicing of the monolith.

**STACK** C# · .NET 8 · Microservices · DDD · Docker · AWS · Google Cloud · Python · SQL · DevSecOps · OWASP · Git

### HIGHLIGHTS

- **Rare end-to-end vision.** Networks, infrastructure and security certification on one side; architecture, back-end, front-end and data on the other — from the WAF rule down to the stored procedure.
- **Legacy modernization under pressure.** Stabilizing fragile ecosystems and rebuilding them into modern distributed architectures without stopping the business.
- **Outcomes, not just code.** Automated design validation that removed rework at TSEA Energia; reliable partner-commission engines; a product suite in production built and operated solo.

## EDUCATION

**Master's in Distributed Systems**
IN PROGRESS
PUCRS
Started in 2026

**Postgraduate — AI Engineering**
UNIPDS
Completed in 2026

**MBA — Software Architecture & AI Solutions**
XP Educação (XPE)
Completed in 2026

**Postgraduate — Full-Stack Development**
PUCRS
2022 – 2024

**Specialization — .NET (C#) & Node.js**
Professional specialization program

**BSc in Computer Science**
Universidade La Salle
Feb 2016 – Dec 2021

**IT Technician**
Escola Técnica Alcides Maya
2014 – 2016 · graduated at 18

## CERTIFICATIONS

**Apache Kafka with .NET Core & Confluent**
Udemy · May 2025

**Clean & Hexagonal Architecture (TypeScript)**
Cod3r · Oct 2023

**Web API .NET 6 + EF Core + Docker**
Spacedu · Aug 2023

**Dapper ORM with .NET**
Spacedu · Aug 2023

**C# Complete Programming**
Cod3r · Jul 2023

## LANGUAGES

**Portuguese** — native
**English** — professional working proficiency

## PROFESSIONAL EXPERIENCE — continued

### Senior Software Engineer — Full Stack
JUN 2025 – JUL 2025

Frigelar · Full-time · (position closed — layoff)

- Back-end services and APIs for high-demand e-commerce in **.NET Core, Node.js and Go**, applying Microservices, Clean Architecture, DDD and the Repository pattern.
- Asynchronous, reliable communication between microservices with **Apache Kafka** and Azure Service Bus / Queue Storage.
- Modern, responsive front-ends in React, Vue.js, Angular and Razor Pages; SQL modeling and query optimization for high-traffic systems.

**STACK** .NET Core · Node.js · Go · React · Vue.js · Angular · Apache Kafka · Azure · SQL

### Senior Software Engineer — C# Back-end
DEC 2023 – MAY 2025

SKA Automação de Engenharias · Full-time · São Leopoldo, RS · On-site

- **Flagship — TSEA Energia (Toshiba Group):** led development of an automated project validator in .NET Framework integrated with AutoCAD libraries, replacing manual design review with automatic rule and inconsistency checking — **eliminating rework, cutting operational project cost and generating significant financial return**.
- **Desktop & CAD automation:** C# / .NET Framework 4.8 with Windows Forms, integrating SOLIDWORKS CAD/PDM libraries and the AutoCAD API to automate industrial engineering workflows.
- Designed and consumed RESTful Web APIs connecting internal systems to external client platforms; modeled and tuned SQL Server with Entity Framework and native SQL.
- Delivered end-to-end features on a second, concurrent team (simulation) with Vue.js, Node.js/Express and a relational database.

**STACK** C# · .NET Framework 4.8 · Windows Forms · SOLIDWORKS API · AutoCAD API · SQL Server · Entity Framework · Vue.js · Node.js · Express · Azure DevOps

### Full Stack Engineer
JAN 2022 – NOV 2023

Safeweb Segurança da Informação · Full-time · Porto Alegre, RS · Hybrid

- Scalable full-stack solutions for the corporate e-commerce and the **"Contador Parceiro"** platform with Angular, C# .NET and SQL Server.
- **Referral & commission engine:** the core feature that automatically calculates and distributes commissions to partner accountants — end to end across .NET services, React screens and SQL Server stored procedures.
- **API integrations:** Safe2Pay and SafeWeb APIs to automate digital certificate issuance and payment processing.
- RESTful Web APIs in C# .NET with Clean Architecture, SOLID and the Repository pattern; Scrum via Azure DevOps with code review as a merge gate and Azure deployment pipelines.

**STACK** C# .NET · Angular · React · SQL Server · Dapper · Entity Framework · Bootstrap · Azure DevOps · CI/CD · Scrum

### Technical Lead — Full-Stack & Infrastructure
OCT 2016 – JUN 2021

CCS Companhia Certificadora Sul · Full-time · 4 yrs 9 mos

- **Technical leadership:** solution architecture, code review and task distribution across the team; translated business requirements into viable, scalable technical scope.
- **Infrastructure & security:** corporate networks, firewalls and physical/virtual servers; the infrastructure required for **security certifications**, ensuring compliance and data protection.
- Automated auditing application integrating a PHP back-end with the network infrastructure; websites, PHP back-ends and Ionic hybrid apps for external clients.
- Full project lifecycle in Scrum via Azure DevOps, with sprint planning and Product Owner alignment.

**STACK** PHP · JavaScript ES6+ · HTML5 · CSS3 · Bootstrap · Ionic · SQL · Firewalls & Corporate Networks · Azure DevOps · Git · Scrum

## OWN VENTURE

FOUNDER — PARALLEL TO CORPORATE ROLES

### Founder & CEO · Full Stack Solutions Architect

JAN 2022 – PRESENT

**Astral Wave Label** · Own company · Remote · astralwavelabel.com

- Founded and lead a Brazilian electronic music marketplace and label, owning both business and engineering: DJs buy club-quality WAV files, pay with **Pix** and download instantly, while artists receive a direct, transparent payout.
- **Edge-first architecture (Cloudflare):** DNS and traffic management, advanced WAF and CDN for low global latency and DDoS mitigation.
- **Polyglot back-end:** .NET Core for critical processing and complex domain rules (DDD), Node.js for lightweight I/O-intensive APIs, Go for high-concurrency microservices.
- **LifeBusinessSuit (LBS):** the suite holding the company's know-how — LoginHUB, MoneyAPP, TodoAPP and NotesAPP, each its own PWA, all behind the same sign-in.

STACK .NET Core · Node.js · Go · React · Vue.js · Docker · Cloudflare (WAF, CDN, DNS) · SQL · Clean Architecture · DDD · REST APIs · Pix · Git

## SELECTED PROJECTS

SUITE · NODE.JS · PWA

### LifeBusinessSuit (LBS)

Productivity and finance suite with a central sign-in: **LoginHUB** (multi-tenant identity provider, JWT + Magic Link + 2FA) authenticates **MoneyAPP**, **TodoAPP** and **NotesAPP** — each an installable PWA with a Telegram bot. It is the foundation of the system I am building as CTO at Sul Alimentos.

Node.js · TypeScript · Vue · React · Express · Drizzle ORM · PostgreSQL · Docker

FULL-STACK · MARKETPLACE

### Astral Wave Label

Electronic music marketplace with polyglot back-end (.NET Core, Node.js, Go), React front-end, Pix checkout and webhook-driven WAV delivery behind Cloudflare WAF/CDN.

.NET Core · Node.js · Go · React · Cloudflare · Docker

.NET · ARCHITECTURE

### AmbevDeveloperStore

Sales system built on Clean Architecture, DDD and CQRS — PostgreSQL for writes, MongoDB for reads, Kafka keeping both in sync.

.NET · CQRS · PostgreSQL · MongoDB · Apache Kafka

FRONT-END · SPA

### Portfolio — moablive.github.io

Vue SPA with vite-ssg prerendering, Tailwind 4 theme tokens, PT/EN i18n validation and GitHub Actions CI/CD; this résumé is generated alongside it.

Vue · Vite SSG · Tailwind 4 · i18n · GitHub Actions

FULL-STACK

### AngularNodeHub

Product and user management platform: Angular SPA consuming an Express API over a MySQL back-end.

Angular · Express · Node.js · MySQL
